LiDAR – INNOVATIVE TECHNOLOGY FOR ARCHAEOLOGY 2

POZNAŃ, JULY 28th – AUGUST 1st, 2014

Following the great interest in last year school MA and PhD archaeology students as well as professional archaeologists mostly from Central Europe and working on past landscape projects are invited to apply to join a training school on **LiDAR – innovative technology for archaeology 2 (LITA2)** to be held in Poznań (Poland).

The main aim of LITA2 will be to understanding of practical methods for data capture, processing algorithms and formal analysis of the results, as well as how LiDAR data can be used to develop appropriate archaeological inferences. The course considers LiDAR/ALS data and will be taught using a combination of lectures and practical sessions.

More info: http://archo.amu.edu.pl/lita_2

Deadline for applications: June 15th, 2014
