

REPORT ON BEATA KAZMAREK'S REVISED PhD THESIS

Athens, 14.2.2023

Dear colleagues, I have read through the latest version of the thesis and it seems that the candidate has indeed done some revisions on the earlier version.

She has also added some bibliographical references, as suggested, and has partly re-written her conclusions.

I believe she has made an effort to comply with the required standards.

I would have preferred to have supervised her efforts, which did not happen.

Nevertheless, although I would have liked to see a more analytical and more up to date approach on various aspects of the archaeological evidence presented, I believe that this time around, because of the effort she put into it, she should be granted the PhD degree.

Yours, Iphiyenia Tournavitou
